Subject: Re: Key hot issues for Stan's trip

Thanks, Kendra! These are great.

+Marianne for awareness...I had talked with her today about pulling together key messages for Stan for a handful of meetings, but I don't think that's needed as you guys have a few bullets on each topic.

I will still work with our folks and Michelle to get him daily bullets on the Gold King Mine next week. Thanks!

Hi Faith, Ann-

As I'm pulling together all the background documents to send, I realize that there are about 50 documents and that might not be helpful to you moving forward. Instead I have included some of the most relevant background papers for topics that will come up with State, community and oil and gas stakeholders. If you want to see the full list, let me know, and I'll add you to the distribution. Also attached is the most recent itinerary.

Let us know if you have any questions!
